Why settle for one luxury electric fireplace when two or more can be combined to make a grand set of flames for a massive visual impact. Get a large, extravagant fireplace installation for a fraction of the cost of an equivalent gas unit; the IgniteXL® Bold gives you high end operation with the look for which you’ve been longing. The IgniteXL® Bold Linear is the first electric fireplace with the ability to link units together for complete customization – pushing length to new limits.
IgniteXL® Bold
Linking Bracket for Modular Installation

Why Invest in a Modular Electric Fireplace?

Lengthy Connections
To get a dramatically oversized linear fireplace that makes a lasting impression, use the linking kit and combine multiple units in a series to achieve your desired length.

Flexible Installation
Choose from multiple configuration options by sticking with a front facing fireplace or by removing the side panels to create either a left, right, or bay unit.

Be in Control
Showcase your bold statement of a fireplace with or without the heat – you’ll have more heat than you need and unlike a gas linear, you can enjoy the flames 365 days a year.

Environmentally Friendly
Electric fireplaces convert 100% of input energy to heat, reducing the environmental impact and increasing energy efficiency.

Completely Safe
No combustion, no carbon monoxide, front glass that is cool to the touch, and you can even deactivate the heater.

Installation Made Easy
No venting or piping required and the unit can be placed anywhere a standard electrical outlet or connection exists.
