

Jacuzzi®

2026 Hot Tub Collection

Year after year, Jacuzzi redefines
what a hot tub can be.

Behind every jet, light, and contour—there's purpose.

Every detail meticulously engineered and crafted.

To relieve stress. To speed recovery.

To sleep better and rejuvenate you.

It all begins the moment you step in.

Nothing else relaxes you like Jacuzzi.
Nothing else energizes you like Jacuzzi.
Nothing else feels this good.

ONLY FR

OM

70 years of breakthroughs...

With decades of expertise in the science of moving water, our pioneering spirit has led to many signature achievements—like precision-placed jets, ergonomic seating, and intuitive controls.

...go into every moment of bliss

Our commitment to wellness drives every breakthrough. We create spa experiences that go far beyond relaxation to support your overall health and vitality, including our exclusive True Water® system and Infrared and Red Light therapy.

From inventing at-home hydrotherapy...

The Jacuzzi story began with a family of inventors whose pioneering patents took off in aviation and agriculture. In the 1940s, Ken Jacuzzi, age 2, was diagnosed with rheumatoid arthritis. Ken's father invented the world's first at-home pump providing pain-relieving hydrotherapy, composed of heat, buoyancy, and optimal massage.

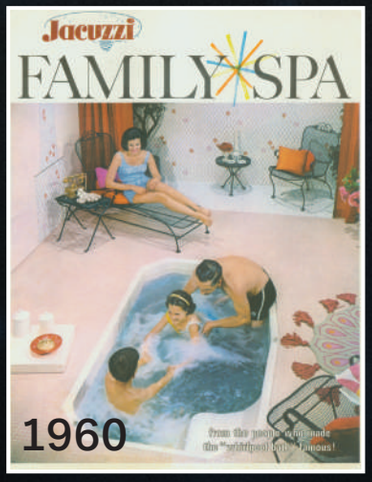

1900

...to perfecting it today

As Jacuzzi became a household name, we've led the way in hydrotherapy decade after decade. Our Aqualibrium® formula produces the perfect balance of air and water, providing a unique high-volume, low-pressure massage that feels gentle on the surface but deep where it counts. And today, Infrared therapy and True Water® have continued to push the boundaries of joy, relaxation, and well-being.

Today

IR and Red Light therapy, another first from Jacuzzi

Our exclusive **Infrared and Red Light** therapy works in harmony with hydrotherapy to soothe and rejuvenate beneath the surface and improve health and well-being.

Check out all the benefits of IR and Red Light therapy.

Rejuvenation meets relaxation

The rejuvenating powers of Infrared and Red Light therapy work together deep beneath the skin's surface to relieve pain, improve range of motion, and help you reach a state of mindfulness.

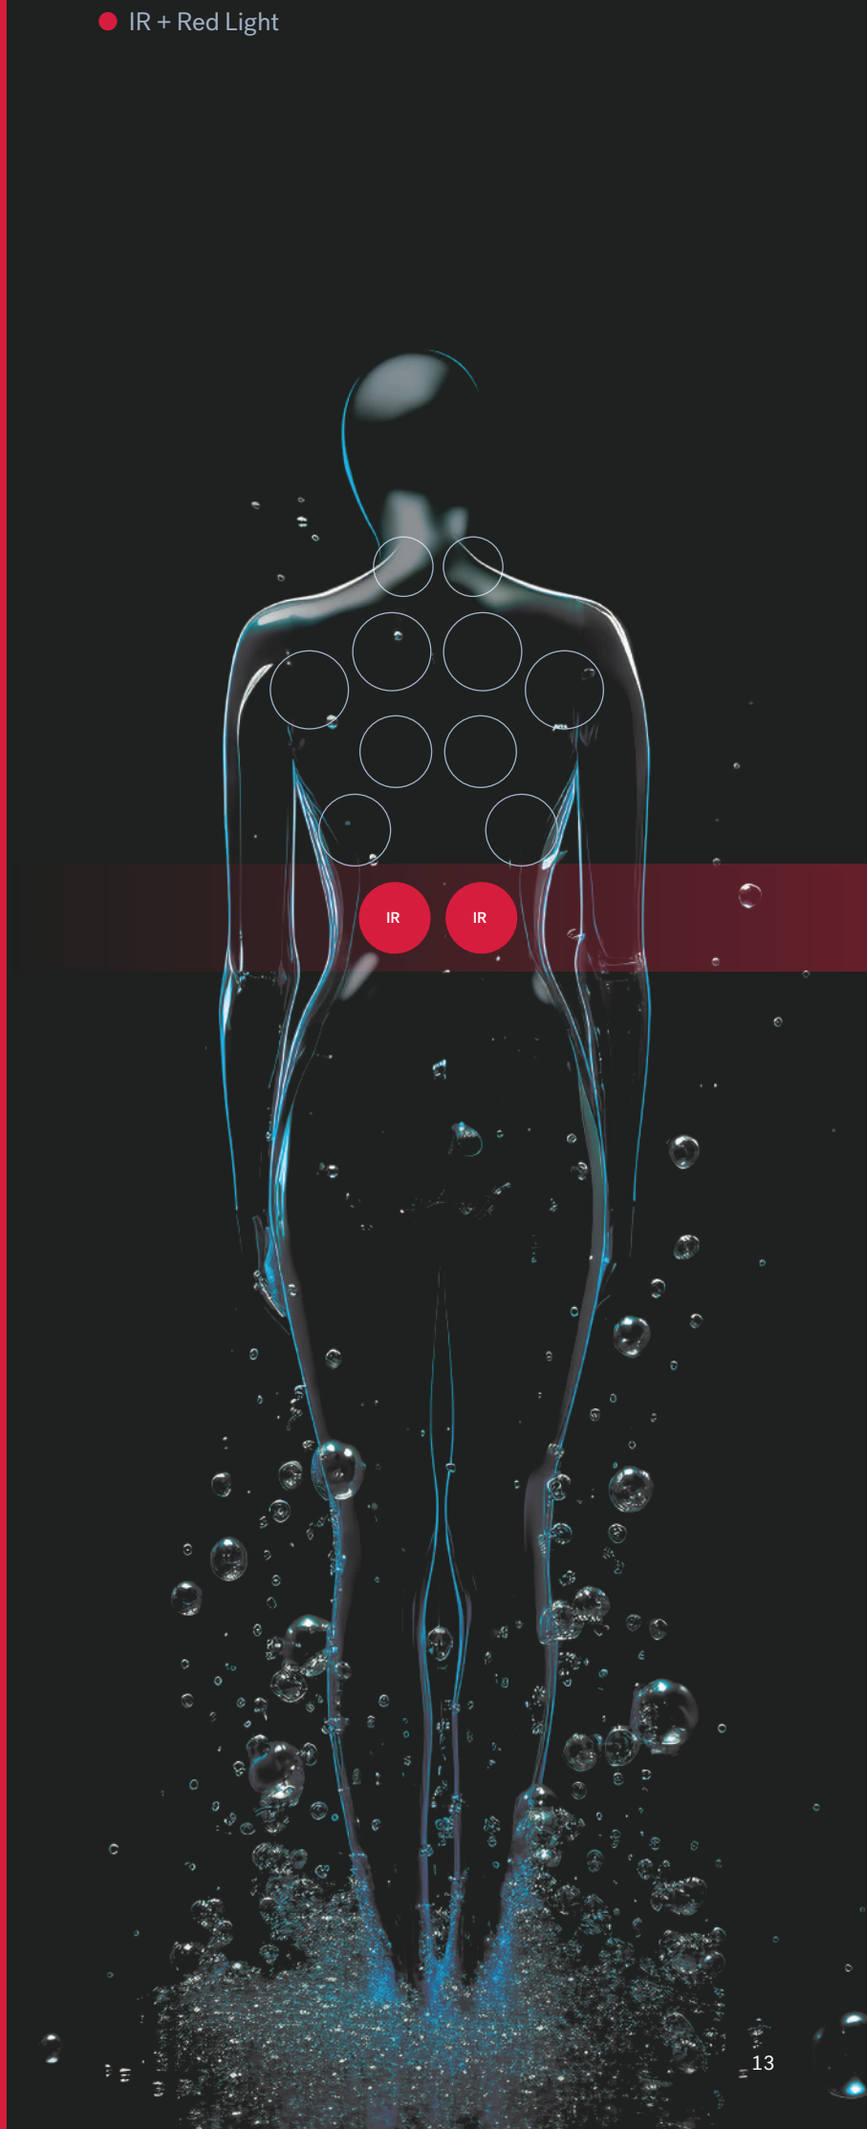

Backed by research

Substantial evidence supports the efficacy of IR and Red Light therapy to relieve pain.[1] To ensure safety, it's been tested by certified third-party Intertek® test laboratories.[2]

Relief where it's needed most

Low back pain is the leading cause of disability worldwide,[3] so we strategically placed our IR and Red Light therapy where it can target deep tissue within the lumbar region of the lower back.

[1] Source: 2008 Cochrane Review
[2] The IR and Red Light device met the IEC 62471 Photobiological Safety Standard
[3] Source: World Health Organization

Skin level penetration

Red Light (660nm)
Specialized deep red light reaches surface tissue and cells

Near Infrared (850nm)
Light is delivered at wavelengths that promote cell regeneration and repair

The next generation of water care

So fresh. So clean.[1] And 99.999% chlorine-free. Our revolutionary **True Water**® system makes spa water fresh and clear without all the harsh chemicals. You'll see, feel, and smell the difference.

Learn how True Water
is revolutionizing water care.

The most beautiful water

True Water brings the revolutionary power of nanobubble technology to home spas. There are no traditional cleaners like bromine or salt. Instead, True Water uses oxygen-filled nanobubbles to continuously cleanse and purify the water. For water so clear, it sparkles. So soft, it caresses and comforts you. So inviting, you'll fall in love with water again and again.

Truly easy to care for

Most spas require daily upkeep but with True Water, you only need to spend about 15 minutes per month caring for your water. You'll spend far less time and money maintaining your hot tub and more time relaxing in it.

Proven effective

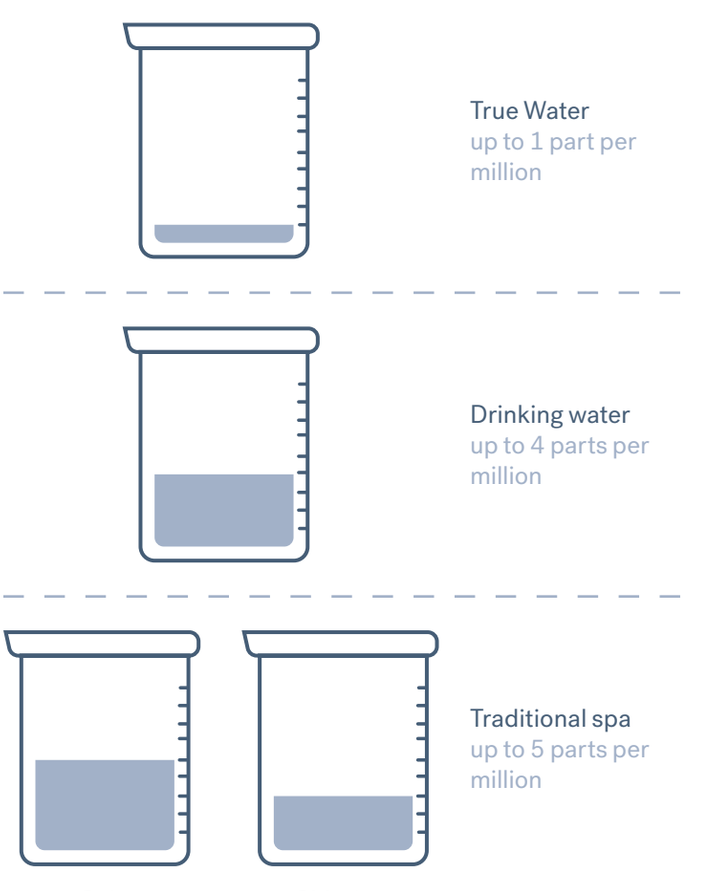

True Water is effective at reducing contaminants[2], and we have the data to prove it. As the nanobubbles oxygenate the water, they deep-clean every part of your spa. Lab results[3] show that True Water has reduced 99.9% of bacteria and viruses[4] without using chlorine or bromine. Effective and beautiful.

[1] Clean is defined as the removal of microscopic debris (down to 3-micron level, varies by model) from the water.
[2] Contaminants include dirt and grit. An independent laboratory found True Water to be 2.5x more effective than regular water at scrubbing hot tub surfaces.
[3] Antimicrobial efficacy testing was demonstrated using a simulated spa design for an in-use laboratory study based on guidance from the Standard Methods for the Examination of Water and Wastewater, 24th Ed., which are referenced in US EPA Guideline 810.2600.
[4] Simulated in-use laboratory study tested against Escherichia coli, Enterococcus faecium, Listeria pneumophila, Pseudomonas aeruginosa, and coliphage (viral surrogate) demonstrated a 99.9% reduction in bacteria and viruses in as little as 2 hours.
[5] Spa water is meant for soaking, not for sipping.

Next-level wellness

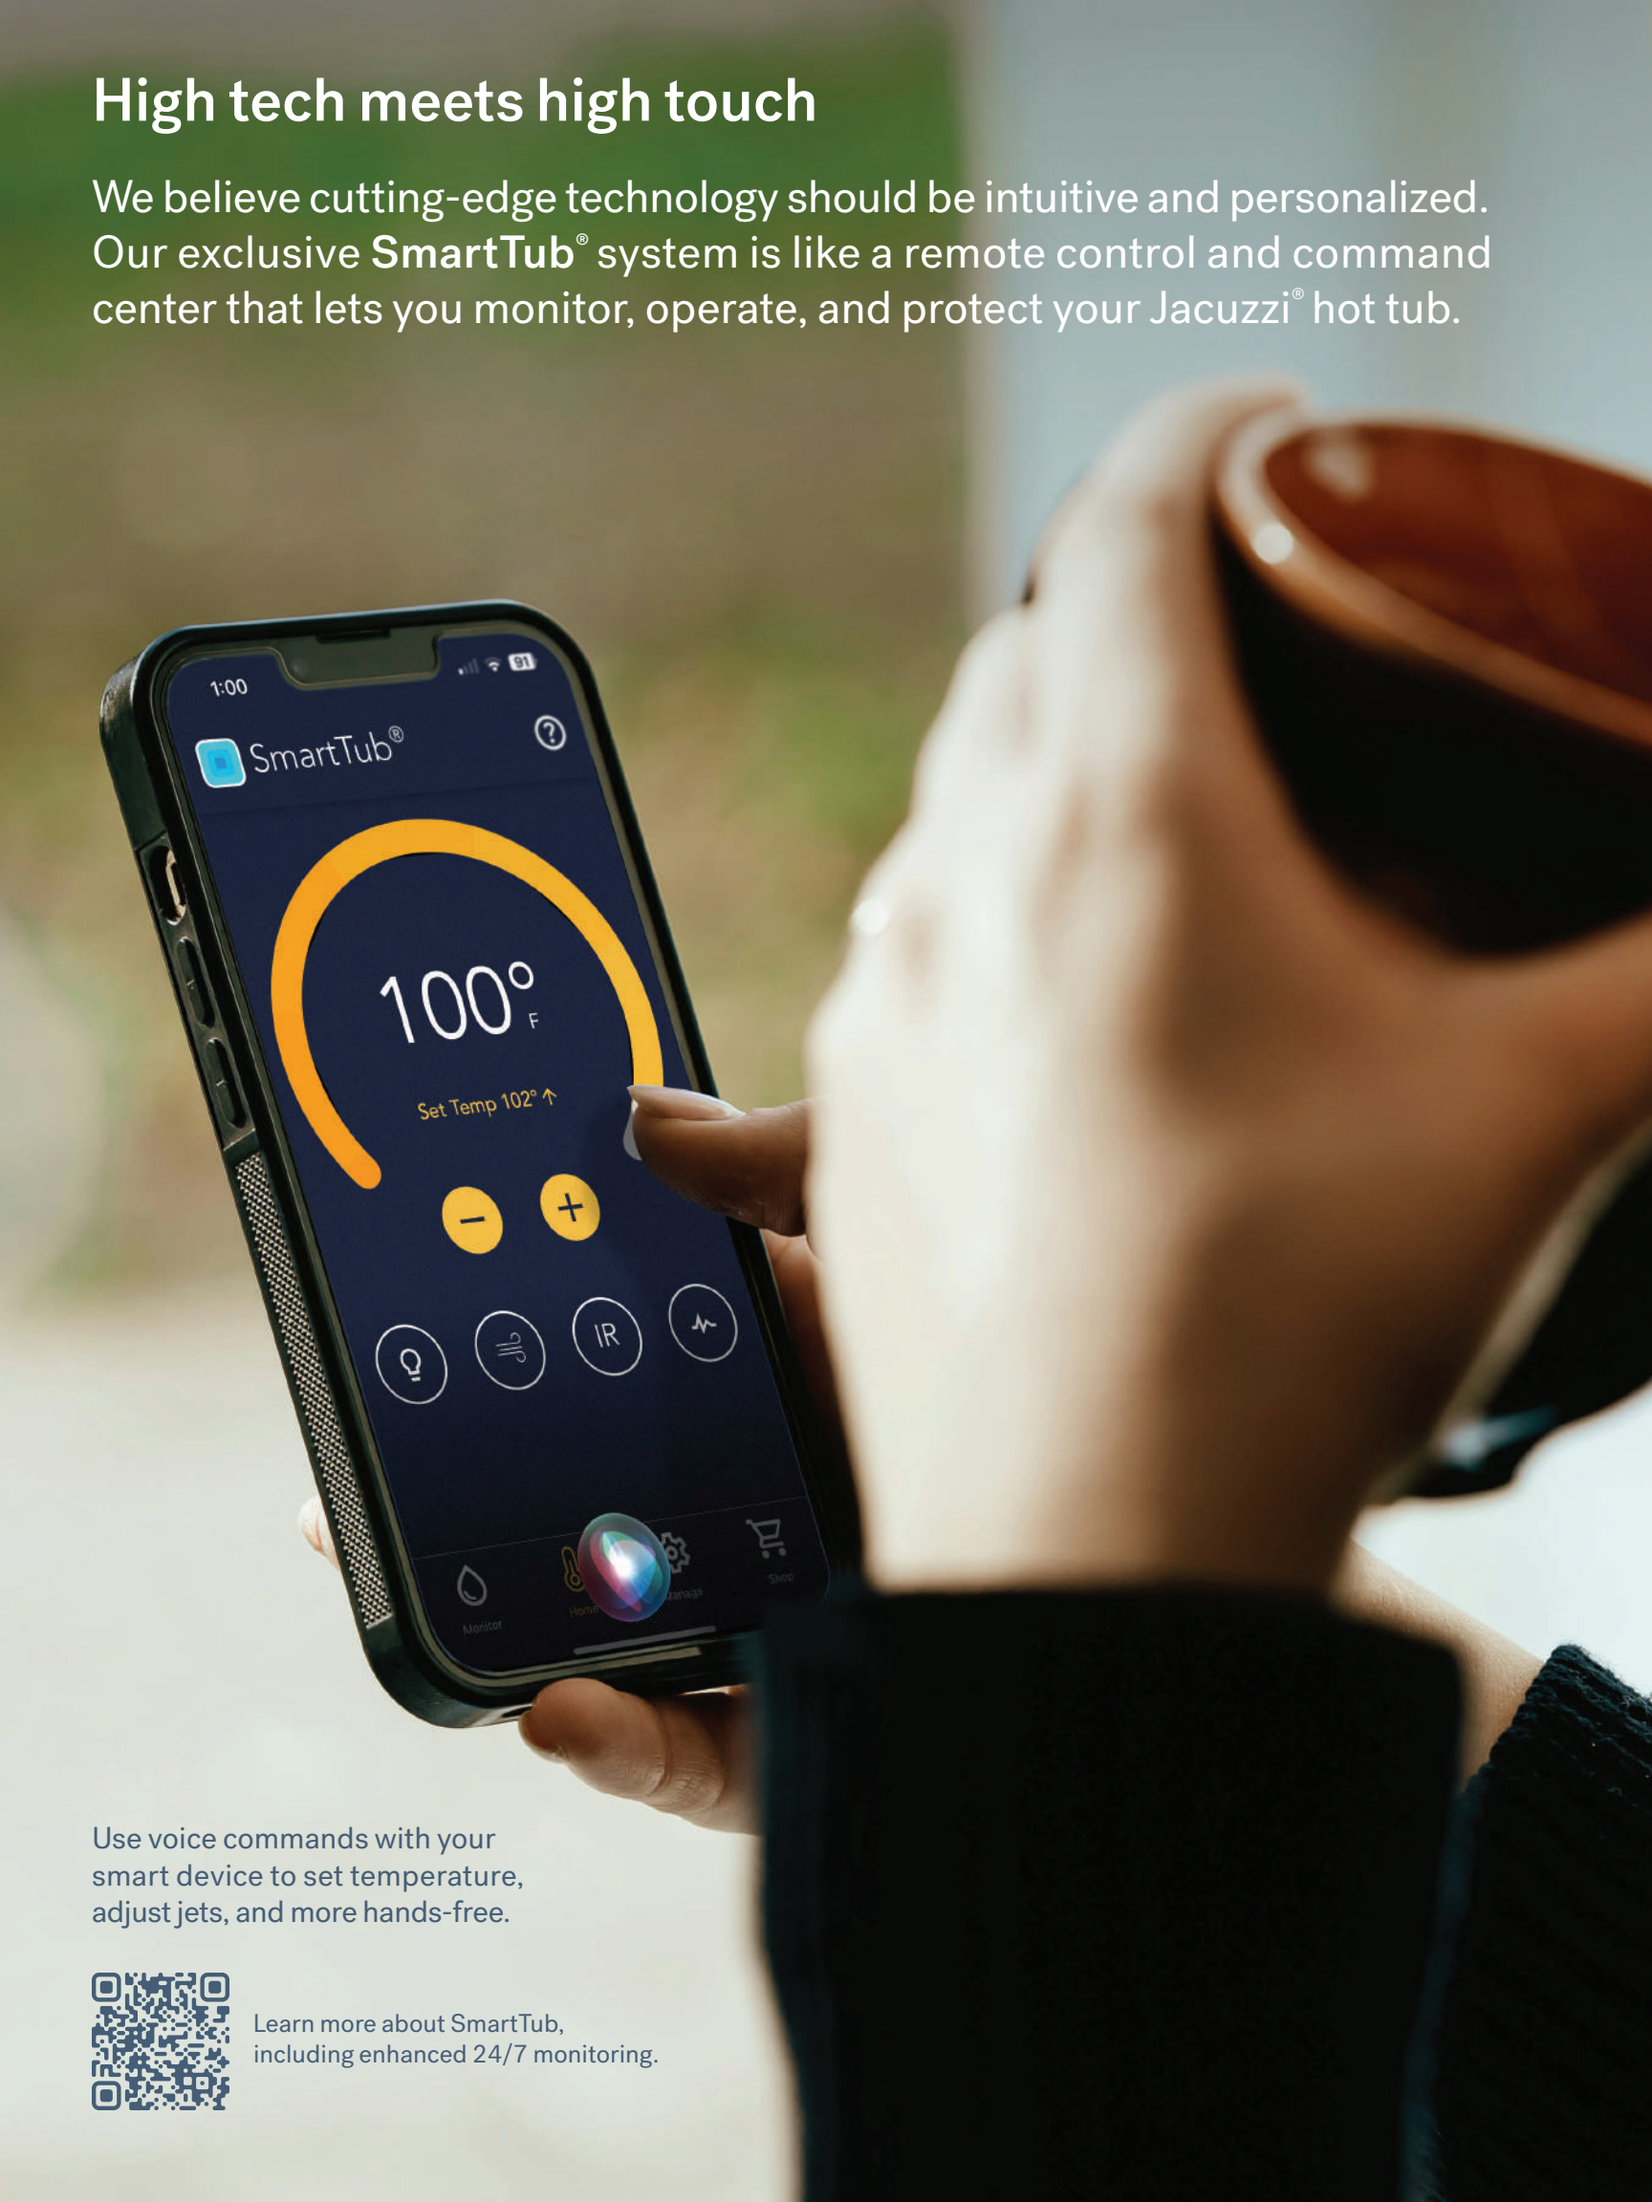

Why pour lots of harsh chemicals into your hot tub? With True Water, trillions of oxygen-filled nanobubbles will continuously scrub away contaminants to deliver clear, sparkling water that's 99.999% chlorine-free. That's even less than drinking water.[5]

How much chlorine is in the water

High tech meets high touch

We believe cutting-edge technology should be intuitive and personalized. Our exclusive **SmartTub**® system is like a remote control and command center that lets you monitor, operate, and protect your Jacuzzi® hot tub.

Use voice commands with your smart device to set temperature, adjust jets, and more hands-free.

Learn more about SmartTub, including enhanced 24/7 monitoring.

Control

You can adjust temperature, jets, and lights, and lock down your hot tub to prevent usage while you're away. Set up your own automated schedule, receive alerts, and check your hot tub status, whether you're at home or on the go.

Convenience

With SmartTub, you can monitor and control your spa and track energy usage from anywhere in the world. Plus, SmartTub performs daily diagnostic checks to ensure peak performance.

Energy efficiency

Smart Heat Mode optimizes savings by using your spa in the most energy-efficient way possible. It can reduce standby power by up to 25% and has a Vacation Mode that minimizes water heating while you're away.

Peace of mind

SmartTub sends automatic alerts and maintenance reminders if your spa needs attention and can detect power outages to protect against freezing or overheating. If any issue arises, SmartTub alerts your Jacuzzi dealer, who can get in touch with you. No other system offers this level of high-touch service.

THE
EXPERIEN

NCE

All the right jets in all the right places

Strategically placed Jacuzzi® PowerPro® jets target specific muscle groups with a completely tailored massage. And because everyone likes their massage a little different, you can adjust the flow and intensity from each jet. It’s the massage that’s right for you.

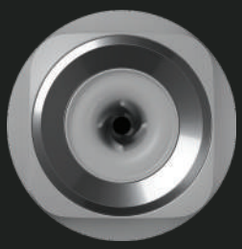

NX

Target zone: Neck

Channel pressure to the sensitive neck area with a highly focused stream that relieves tension and strain. Move the nozzle to personalize massage direction.

FX

Target zone: Shoulders, back, and feet

Exclusive spiral design focuses on smaller muscle groups with an energetic impact, stimulating pressure points on the shoulders, back, and feet.

VX

Target zone: Legs, feet, and wrists

By pulling in a large volume of air and pushing out a wide plume of water, it generates a gentle, yet powerful massage to unlock tight, overworked muscles.

MX

Target zone: Full Back

The original performance therapy jet. The MX includes a completely adjustable nozzle with a 60° range for bold, high-volume massage action right where you need it.

RX

Target zone: Middle and upper back

The powerful kneading motion provides a full-coverage massage to relieve muscle tension, primarily in your middle and upper back.

FX-R

Target zone: Shoulders, back, and feet

This high-speed rotating jet combines broad coverage with penetrating power, reaching deep-tissue layers in the center of the lower back.

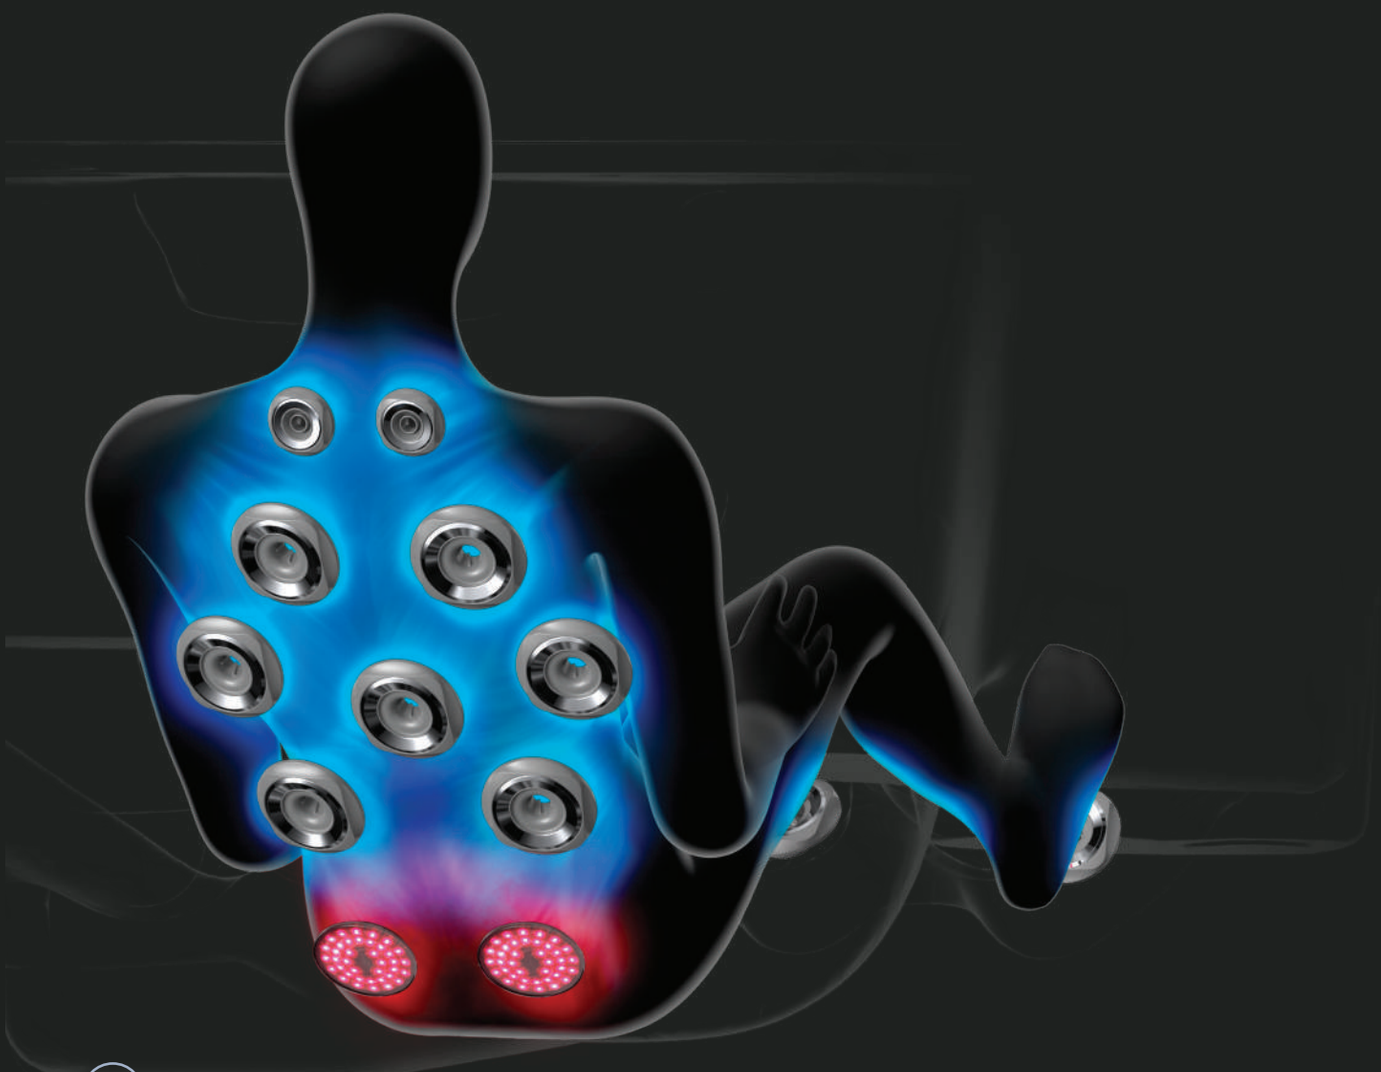

BX

Target zone: Legs and wrists

Its patented design, developed to reinvigorate leg muscles, produces a soothing massage with our highest air-to-water ratio for a bubbly effect.

Please be seated

Each Jacuzzi® hot tub features a thoughtfully engineered seat configuration that delivers personalized hydromassage and evenly balanced flow—so every seat offers an exceptional experience and every hot tub offers full-body massage.

A

A

FX-IR therapy lounge

Neck, shoulders, back, legs, and foot relief

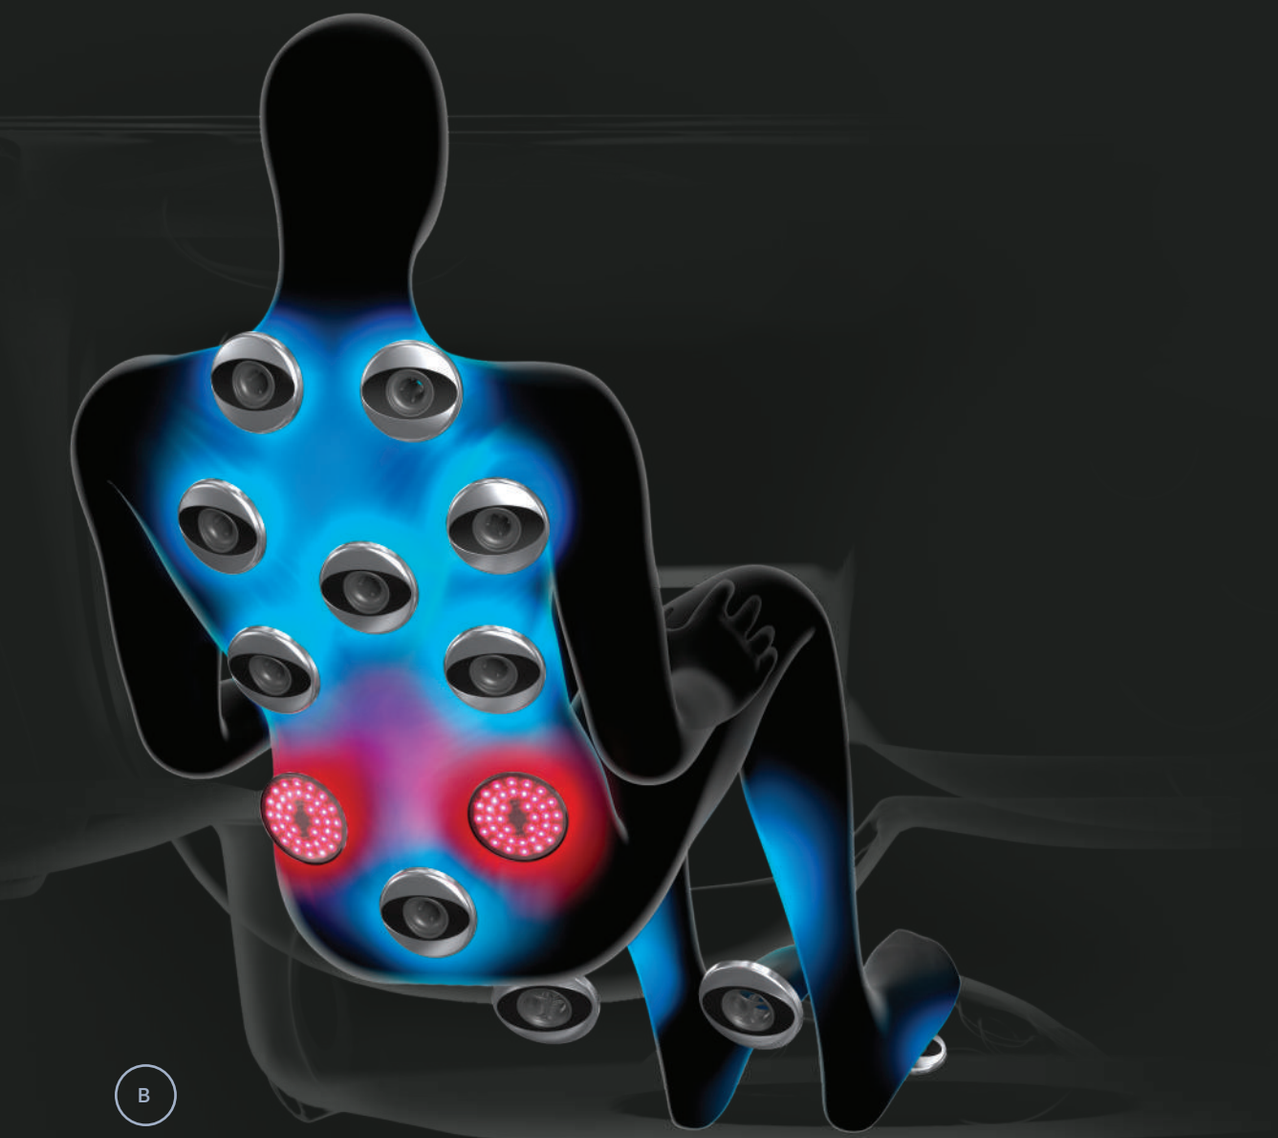

The world's first IR lounge builds on the world's first IR seat with a full-body experience. Along with the full back and neck hydromassage, FX jets relieve stress and strain along the legs and feet as IR and Red Light therapy target deep tissue in the lower back. Whole body comfort. Whole body wellness.

B

FX-IR therapy seat

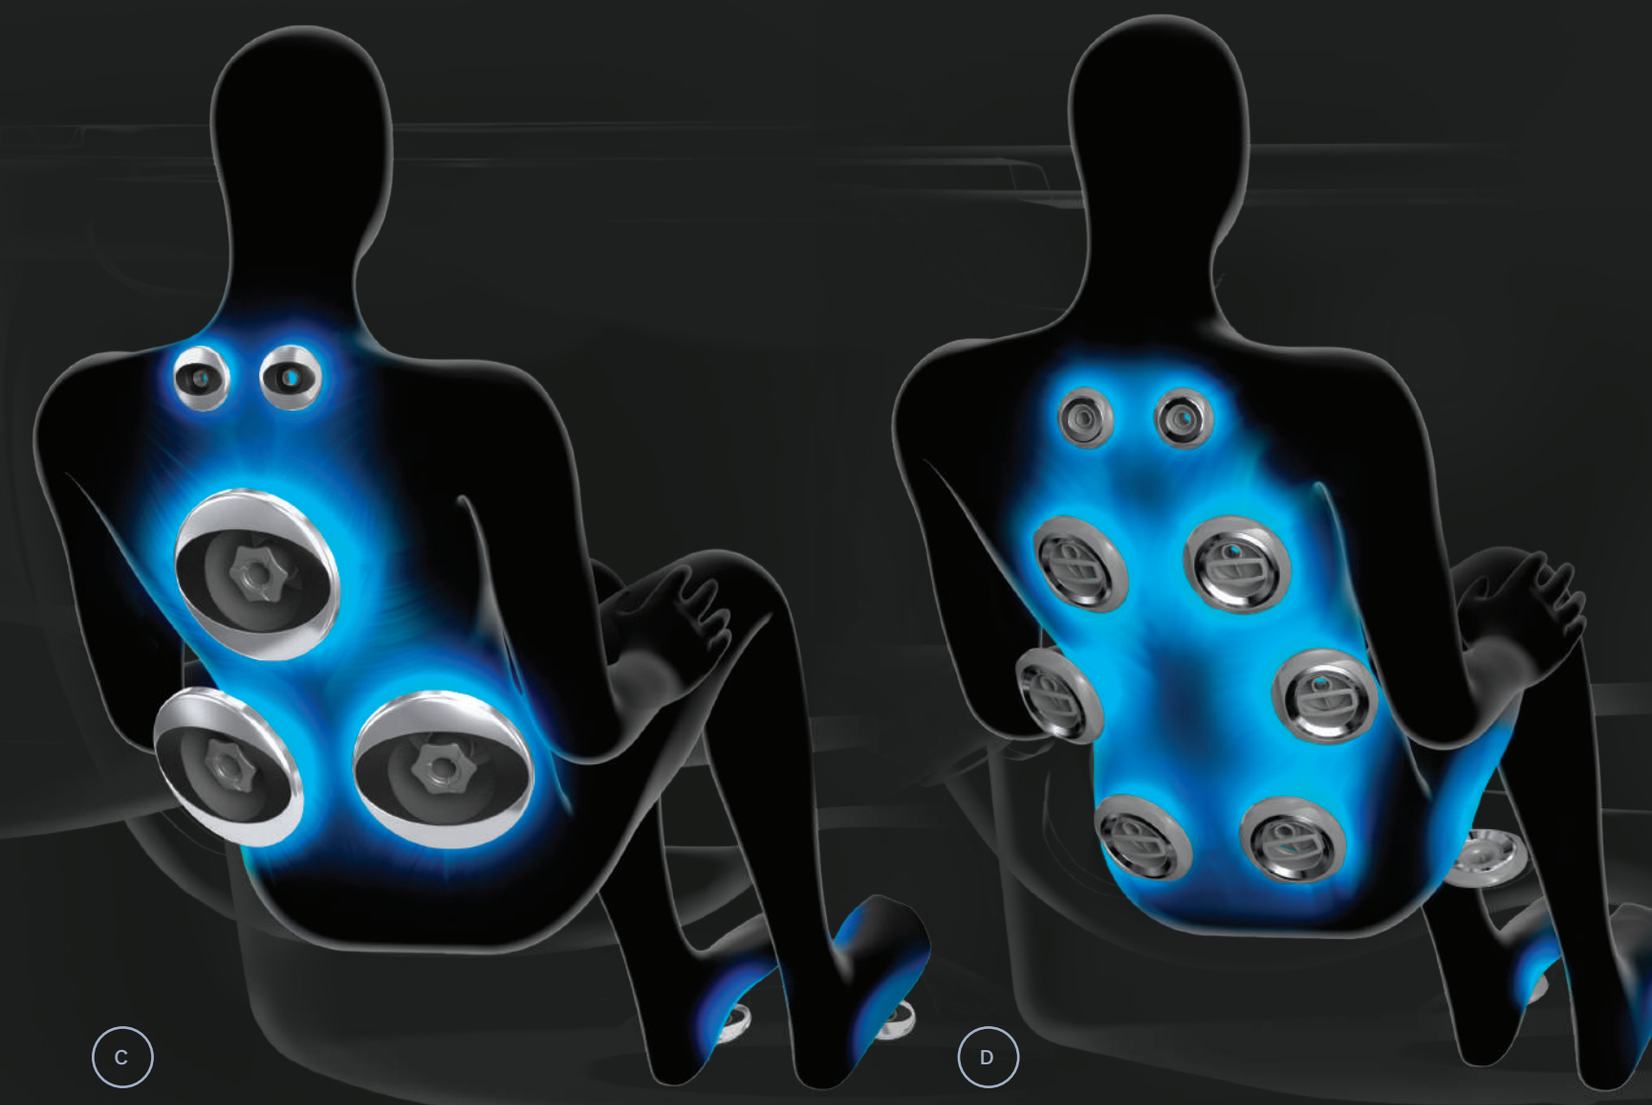

Neck, shoulders, and back relief

A collection of FX jets combines full back and neck hydromassage with Infrared and Red Light therapy that zeroes in on deep tissue within the lumbar region of the lower back. It's an unprecedented and rejuvenating hot tub experience.

B

Each seat is sculpted with an ergonomic focus to cradle the contours of the body. Specialized Jacuzzi® PowerPro® jets—recessed for your complete comfort—are thoughtfully positioned to relieve tension-prone muscles.

C

D

C

MX therapy seat

The original in low-back relief

Ease into this deeply contoured seat to release tension in the lower back with a high-volume, low-pressure massage. Maximized air output delivers a soothing deep-tissue massage. Paired with neck jets for a fully relaxing experience.

D

RX therapy seat

Comforting back and shoulder relief

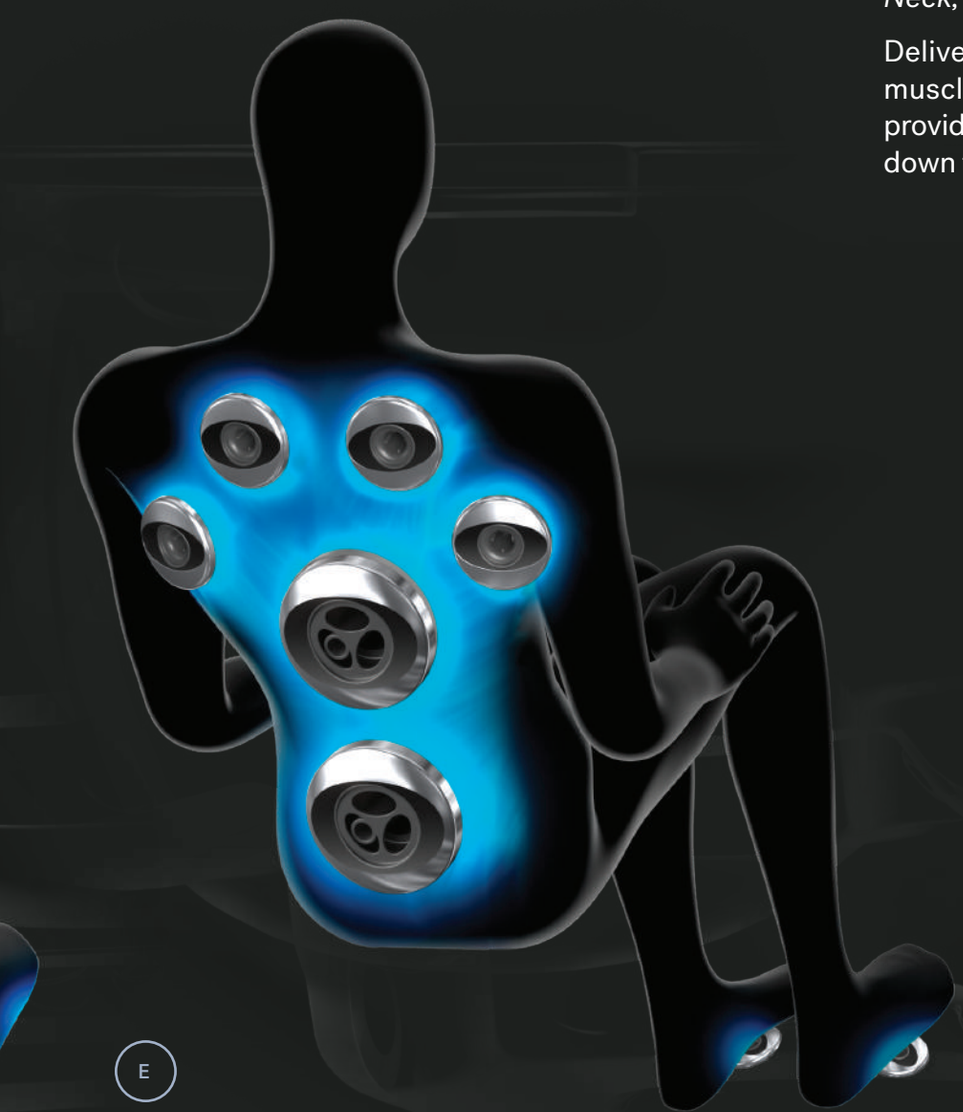

A ring of spinning RX jets targets back and shoulder muscles to soothe stiffness and release tension, while neck jets add further relief. The seat plays a vital role in our highest performing hydromassage.

E

ProAir™ seat

Neck, shoulder, and back relief

Delivers the best of both worlds, pinpointing muscles along the neck and shoulders, while also providing relaxing hydromassage to larger muscles down the back.

E

A holistic approach to water care

Every Jacuzzi® hot tub includes filtration and water treatment technology to deliver exceptional cleaning[1] power and reduce the need for chemical sanitizers.

Clean water, less effort

Harness the power of active oxygen for a hands-free approach to water care. **ClearRay Active Oxygen®** system breaks down and neutralizes contaminants.[3] It works harder to clean the water longer.

5-Stage[2] filtration process

Cleaner water means fewer water changes and less effort for you.

Stages 1 and 2

The skimmer and unique mesh ProCatch™ bag work together to clean the surface water and trap large debris for easy removal.

Stage 3

This exclusive system features a ProClear® filter, connected directly to a ProStream™ filtration pump, that filters an incredible 35 gallons per minute, giving you clean water, faster.

Stage 4

The ProClarity® polishing filter polishes the water down to a 3-micron level.

Stage 5

The ProClear filter activates and cleans when you are using the hot tub. This doubles the filtration when you need it most.

[1] Clean is defined as the removal of microscopic debris (down to 3-micron level, varies by model) from the water.
[2] Stages of filtration may vary by collection.
[3] Contaminants include dirt and grit.

Beautiful water that's 99.999% chlorine-free

True Water® brings the power of nanobubble technology to home spas. It's the same technology used by advanced aquaculture and next-generation water purification systems.

Inspired by nanobubbles found in nature, such as crashing waves and waterfalls, True Water uses trillions of oxygen-filled nanobubbles—5,000 times smaller than a grain of sand—to continuously clean[1] the interior of your spa. They scrub away and reduce contaminants[2] to deliver clear, sparkling water that's 99.999% chlorine-free. You'll see, feel, and smell the difference.

True Water is effective at reducing contaminants[3] and we have the data to prove it. Lab results[4] show that it reduced 99.9% of bacteria and viruses[5] without using chlorine or bromine.

Get the full story of True Water on page 15.

[1] Clean is defined as the removal of microscopic debris (down to 3-micron level, varies by model) from the water.
[2] Contaminants include dirt and grit.

The serenity is in the details

We build our hot tubs to be as reliable as they are relaxing. They're engineered to perform with high-grade materials and precision-crafted components—all rigorously tested for lasting enjoyment, year after year, with minimum upkeep.

Featured components vary by model.

A

ProLast™ cover

Lock heat in with our durable ProLast Cover. The vacuum seal retains heat and maintains water temperature longer for lower operating costs.

B

Illuminated waterfall

A cascading stream of water with soothing sounds creates a calming ambient atmosphere.

C

ProFusion™ shell

Highest-quality acrylic, a bonded vapor barrier, and a resin composite provide superior durability, even in extreme temperatures.

D

High-performance energy-saving insulation

Insulation surrounds the shell and fills the cabinet, resulting in lower operating costs, quieter operation, and reliable performance in the coldest climates.

E

Tool-free cabinetry

Durable, maintenance-free cabinetry withstands heat and cold and stays beautiful longer.

F

SmartTub® remote monitoring upgrade

Includes a Cover Sensor to ensure your cover is always on; a Fill Sensor to save time filling or draining and let you know when water level is low; and a Water Sensor to detect when water is near sensitive components.

G

Propolymer base

This strong, rugged foundation protects and insulates the spa from moisture and the elements.

COLLECT

TIONS

The next wave of innovation is here
Introducing the J5™ Collection. More immersive. More luxurious. More than you imagined a hot tub can be.
Take a comprehensive spin through the new J5.

J5™ Collection

The J5 is a full-on immersive experience that supports your mental and physical well-being. Choose from three levels of hydromassage intensity or ease into full-seat IR therapy. More wellness. More personal. More intuitive. The only hard part—deciding to get out.

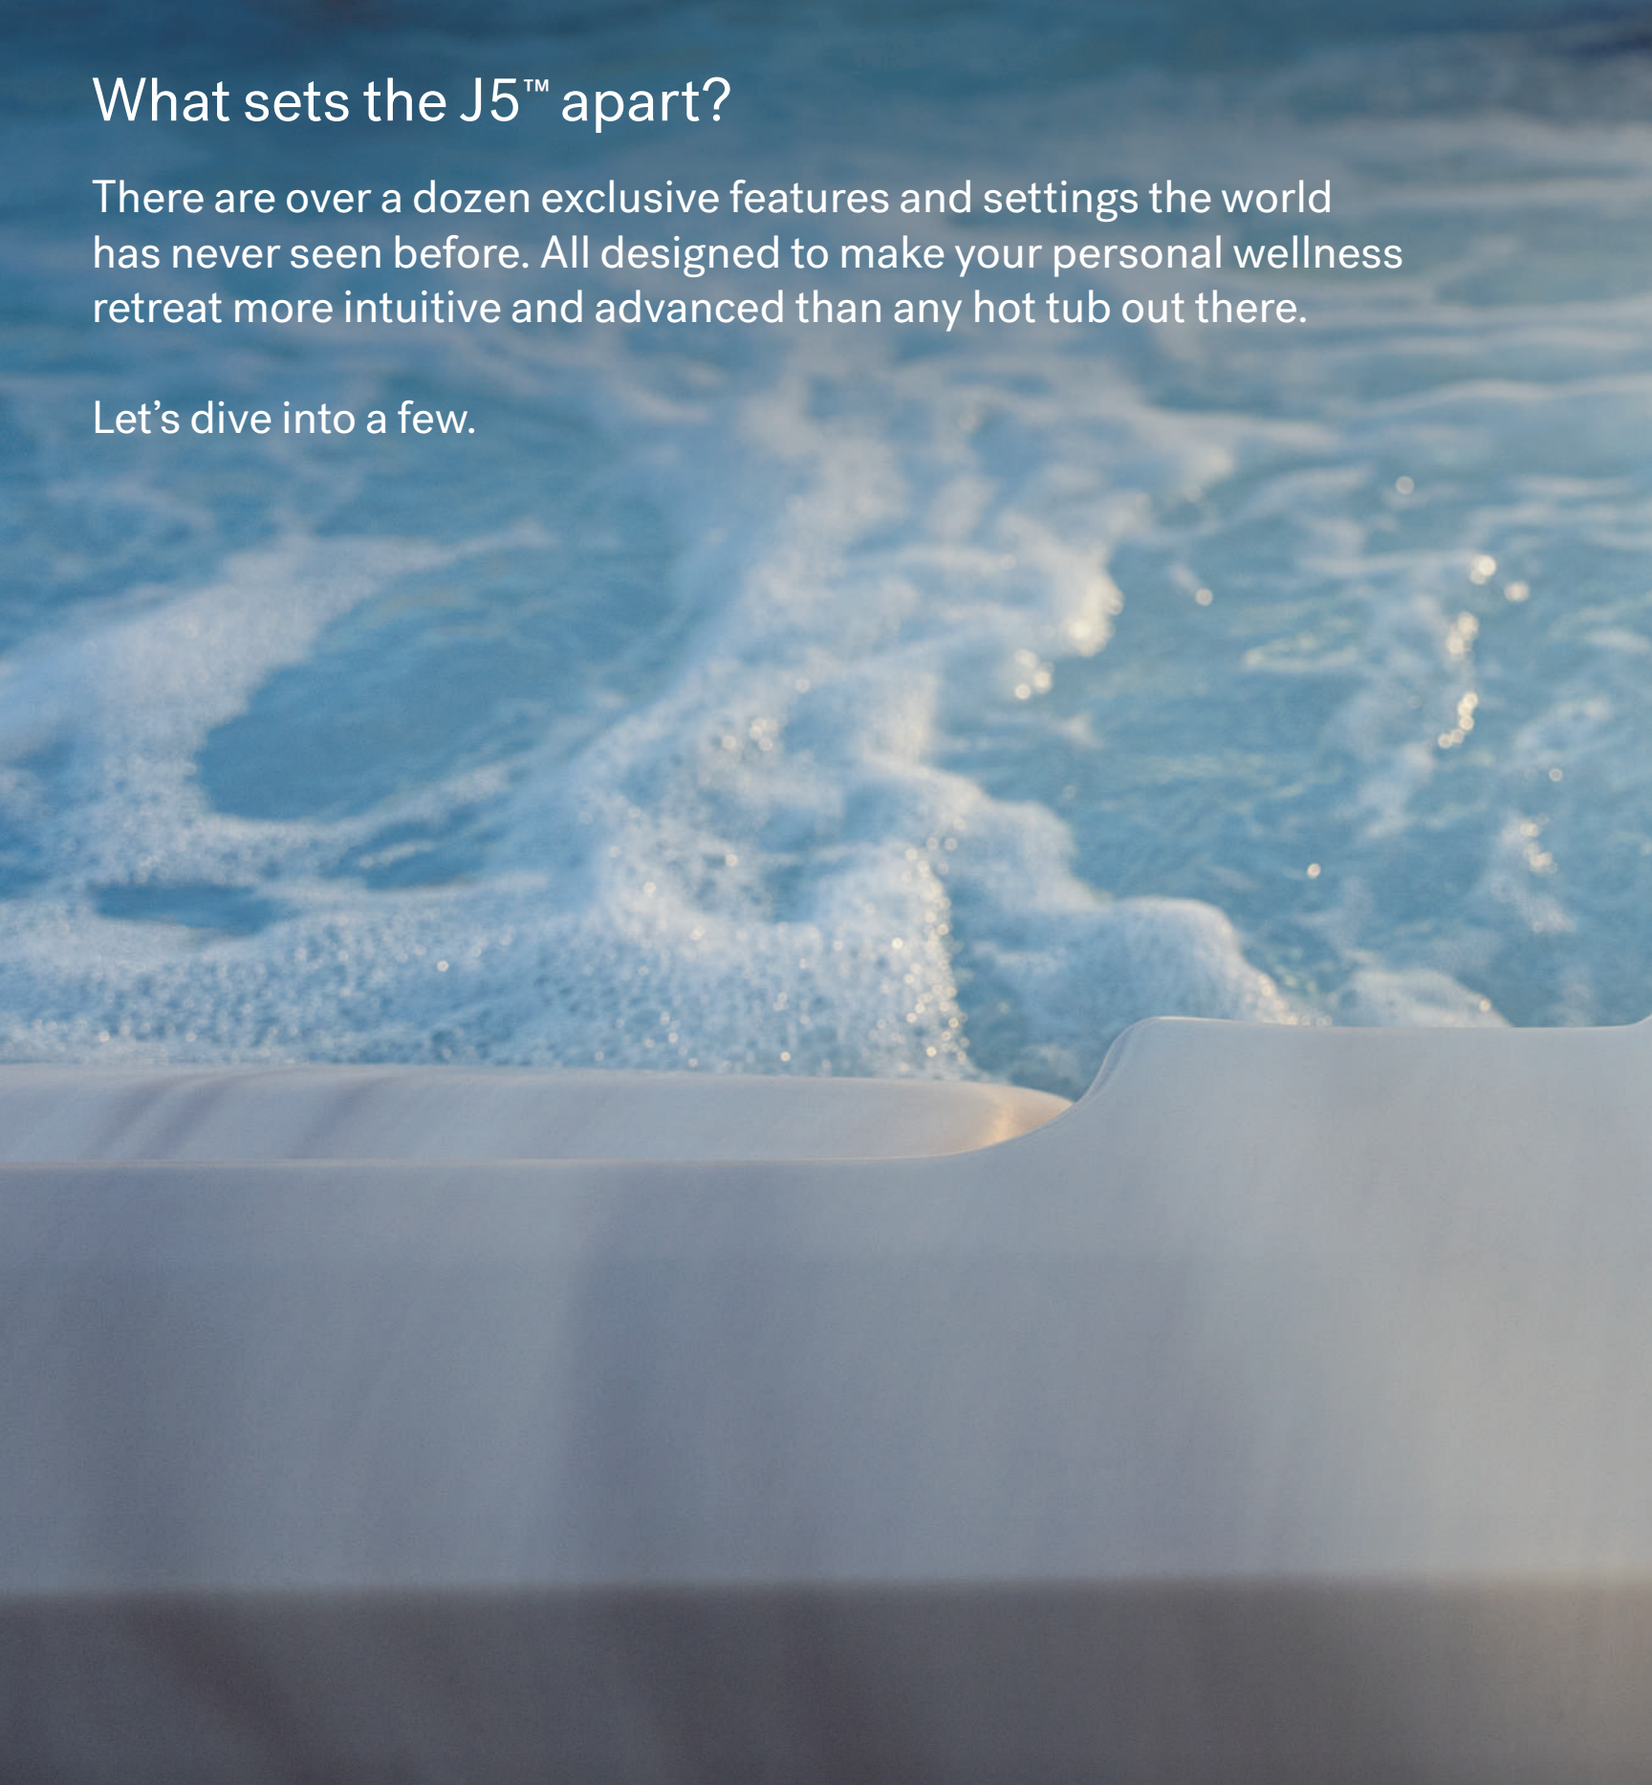

Jacuzzi

What sets the J5™ apart?

There are over a dozen exclusive features and settings the world has never seen before. All designed to make your personal wellness retreat more intuitive and advanced than any hot tub out there.

Let’s dive into a few.

One tap is all it takes.

Want better sleep? There’s a mode for that. Need faster recovery? There’s a mode for that. Five fully immersive experience modes in all—each its own curated, multisensory experience with coordinated hydromassage, IR therapy, and lights.

Our most advanced hydrotherapy ever

Relaxation and recovery are easy to come by with three preset hydromassage levels, ranging from gentle circulation to intense massage. Full-seat Infrared therapy adds rejuvenation that’s more than skin deep to your wellness routine.

Personalized for each user

Each family member can tailor the spa settings to their liking, so each experience is unique and personal. Just save your preferences to a user profile and one touch activates your custom spa session, even before you step in.

So easy, you can relax

The SmartTub® app for J5 achieves an unmatched degree of intuitive control. Easily choose experience modes, generate user profiles, set schedules, track IR usage, check energy savings, and take charge of nearly every aspect of your spa.

[1] All specifications are subject to change without notice. Hot tub dimensions are approximate and shown in L x W x H. The images are for layout reference; they do not reflect acrylic options. The product is shown with IR + Red Light therapy (optional). If selected, the IR lights replace 2 of the jets, reducing the jet count. [2] Not all electrical configurations are listed. Please see the Jacuzzi® Hot Tub Dimension and Specification Handbook for additional details. [3] See Jacuzzi® Hot Tub Dimension and Specification Handbook for detailed weight considerations for installation.

Optional upgrades

True Water® system
True Water keeps spa water clear, beautiful, and 99.999% chlorine-free without all of the harsh chemicals. You'll see, feel, and smell the difference.

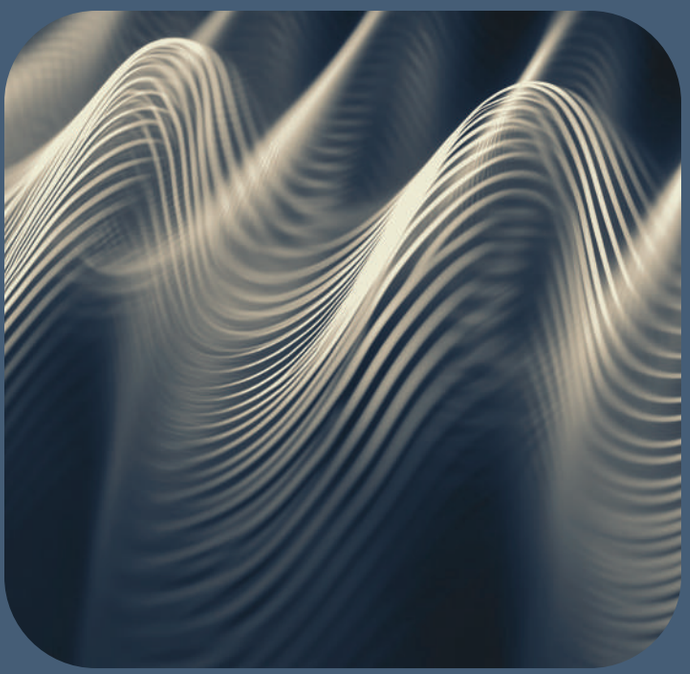

Infrared and Red Light therapy
Experience the rejuvenating powers of Infrared and Red Light therapy to relieve pain, improve range of motion, and help you reach a state of mindfulness.

Extreme cold weather package
Designed to help your hot tub withstand winter's chill, the package includes SmartSeal insulation that retains heat and reduces energy costs, as well as an upgraded cover designed for cold weather.

Entertainment package
Personalize your hot tub playlist with the BLUEWAVE spa stereo system. Connect via Bluetooth® to play music from your phone through the hot tub speakers with full surround sound.

J-200™ Collection

Pleasing aesthetics, rejuvenating hydromassage, and legendary comfort are what Jacuzzi is famous for, and that sets the foundation for our most affordable hot tubs—now with an updated look. Take a seat and enjoy the view from this warm-water escape.
